

We advise all our clients to use our service once as more of a test case and then we can sit down to discuss how Benvolo can help your organisation.

Benvolo has been 3 years in the making and now we have the technology and ability to deliver consistently profitable results to our client partner's - month in and month out.

A high percentage of companies struggle to find good external resourcing partners, offshore companies and day rate consultants are the two most common forms. The offshore companies are renowned for failing to deliver anything tangible and the day-rate consultants can be very expensive with limited success. Benvolo is unique in that we combine the best of everything to deliver to you passive candidates quickly and cost effectively.

We offer a range of packages to suit most sizes of organisations. We have tried to simplify the details below and the searches can be drawn upon when required.

**One-Off Search - £499**

**5 Search package - £2,249**

**10 search package - £3,995**

**20 Search package - £7,495**

**Over 20 searches - POA**

All our packages are pre-paid albeit that way we can keep the costs down whilst delivering what you need. If there are more comprehensive projects that need covering, we will discuss this on a case by case basis. Also, if you don't use up your search credits in a month, they will just rollover.

We have the ability to scale rapidly depending on your needs and we have found that a lot of clients can now break into new markets or resource major projects around the world in days.

Industry Sectors: 100% coverage

Locations: Global
